**Steve Hartley**

Balfour Beatty

Dear Steve,

I am writing about the Electrician vacancy on the new Sheffield University campus project. I have spent the last three years at NG Bailey working on commercial fit-outs and education builds across South Yorkshire, and the scale of Balfour Beatty's construction work, and the opportunity to work on a landmark project in my home city. Is what drew me to apply.

My most recent project was a £4.2 million office refurbishment at Sheffield Digital Campus where I was the lead electrician, installing power, data, and lighting across four floors. 280 LED fittings, 160 power outlets, and 90 data points. I issued the EIC with zero defects at handover. I have also completed the electrical installation on a £1.8 million school extension for Sheffield City Council, including fire alarm and emergency lighting systems. Before NG Bailey, I spent four years at Bagnalls completing 35+ domestic rewires and installing 22 EV charging points under the OZEV scheme.

I hold a JIB Gold Card, the City & Guilds 2391-52 in Inspection and Testing, and the 18th Edition Wiring Regulations qualification. I am currently supervising two apprentices on site. I am comfortable reading technical drawings, working on occupied sites, and delivering to tight programmes. I would be happy to discuss my experience further at your convenience.

Best regards,

Declan Thorpe
